

## Reconstructions and Observations in Archival Resources – Golden Agents

**Video:** ROAR++ ontology meant to support (manual or automatic) representation of persons' mentions in archival documents.

#### Broader goal:

- **Sources** of the observations can be other than archives
- **Entities** can be people, objects, legal properties or even abstract ideas.

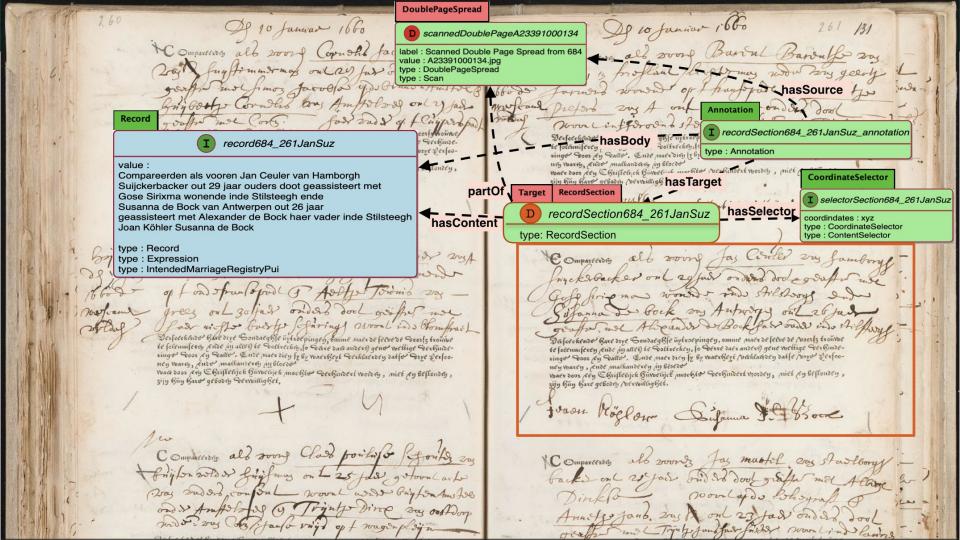

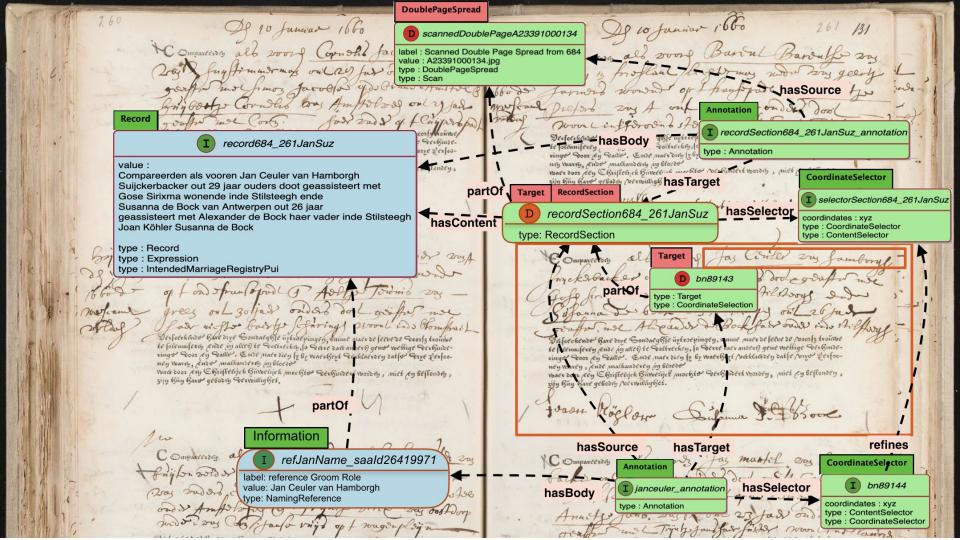

#### **How much Provenance?**

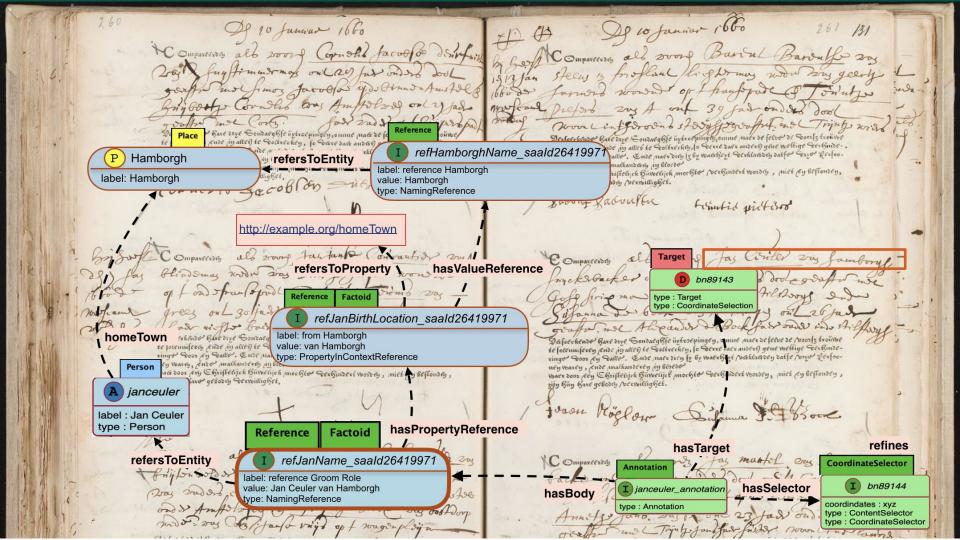

• Requirements, expectations, or limited resources would lead to different answers.

#### There is no one size fits all!!

• **Different Levels of Provenance/Interpretation** are complementary, i.e. more can be added given new requirements or resources. They may also indicate different vocabularies that could be used.

# Other examples of detailed Provenance

### **Probate Inventories**

Hol - Er folderij bam somaritac

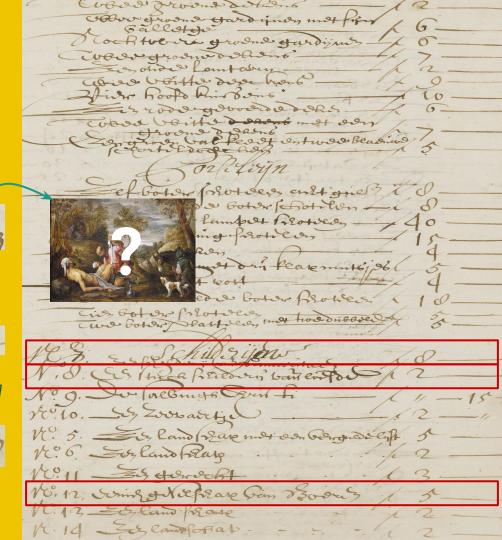

No. 7. Een schilderij van de Samaritaen [No. 7. A painting of the Samaritan]

110. Cos the a fitter bom en of 2
